Education

Emory University

Bachelor of Science in Computer Science

May 2027

Atlanta, GA

- Completed: Multivariable Calculus, Computer Architecture, Advanced Algorithms
- In Progress: Data Mining, Database Systems, Artificial Intelligence
- Activities: Intramural Soccer, Futsal, Chess, Pep Band
- Vice President, M||E Competitive Programming Club

Experience

Amazon

May 2025 – Aug 2025

Full Stack SDE Intern [Return]

Seattle, WA

- Developed two features in an internal Amazon platform called Wedge to simplify evidence insertion into an index
- Authored a design document with a background problem, list of stakeholders involved, and AWS architecture diagrams
- Technologies: Python, React TS, CI/CD, Unit Testing, AWS (IAM, S3, SNS, Glue, Event Bridge)

Amazon

May 2024 – Aug 2024

Full Stack SDE Intern

Seattle, WA

- Developed a feature in an internal Amazon platform called Harmonia to enable ingesting images into Claude prompts
- Feature adopted by the team's applied scientist for determining whether two Amazon products are substitutes
- Technologies: Python, CI/CD, Unit Testing, AWS (S3, Lambda, Step Function, Bedrock)

Oteemo

June 2023 – Aug 2023

AI Intern

Remote

- Completed the Advanced Computer Vision with TensorFlow course on Coursera at the request of my mentor
- Participated in a computer vision research project that developed an app that can match 9mm bullets with guns
- Wrote over 50% of the literature review for the project presented at the International Criminology Hybrid Conference

Projects

C-3BO | *Python, TensorFlow, Kivy*

- Developed an app capable of detecting leukemia types with high accuracy using CNNs
- Github Repository: <https://github.com/Tofudog/C3BO-Cancer-Blood-Oncologist>

Yeetcode | *Websocket IO, Node JS, MongoDB*

- Created a Chrome extension enabling head-to-head LeetCode battles
- Github Repository: <https://github.com/Tofudog/Yeetcode>

Personal Website | *React, Tailwind CSS, Daisy UI*

- Built and deployed my personal portfolio using Netlify
- Github Repository: <https://github.com/Tofudog/Personal-Website/>

Brain Check | *Swift, iOS*

- Developing a humorous iOS app showing the number of brain cells lost after a button click
- Github Repository: <https://github.com/Tofudog/Brain-Check>

Skills

Languages: Python, Java, C, C++, TypeScript, Swift, HTML, CSS

Frameworks/Technologies: TensorFlow, React, Node, Kivy, AWS, GCP, PostgreSQL, MongoDB

Developer Tools: Git, Xcode, VS Code, Vim, DBeaver, Postman, Figma, LaTeX

Core Strengths: Data Structures and Algorithms, Machine Learning, Full Stack Development, Prompt Engineering

Languages (spoken): English, Portuguese, Spanish, Hebrew

Interests: Competitive Programming, Chess, Biking, Traveling
